Art Unit: 3751

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 9-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Epple et al '572 as set forth in paper #4.

Applicant argues that Epple et al fails to teach a lid " having a rear edge connected to the rear wall of the cover box". It is submitted that '572 has a rear edge as depicted in Fig. 3 and that it is " connected to the rear wall" as this term finds no specific support in the instant specification to define over the residence of the lid 38 of '572 as shown in Figs 1 and 3. Certainly this lid has some support with respect to the pool and cover box, either of which meets the term " connected " as employed in instant claim 1 and defined by the disclosure which is silent with respect to the term " connected to".

As to the argument at the top of page 3 of paper #6, there certainly is no support for the advanced " the lid be attached to the rear wall at the lid's rear edge" in the instant disclosure.

With respect to the arguments for the "lid edge support "at the middle of page 3, while element 22 may not be named as a lid edge support, it certainly assumes this

Art Unit: 3751

position in Fig. 5. The unnumbered element carrying the fiber optic slot 28 could as well perform this function.

The claim 2 base and facia are seen on the structure housing element 28. The rejection of claim 2 in paper #4 refers to the facie (sic) as 26. This element is seen to cooperate with lid 38. If this structure is a "base" in the instant device it is a "base" in '572 as the structures are nearly identical and no structural distinction thereover is disclosed or claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Epple et al as set forth in paper #4.

Claims 15-26 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Page 4

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Charles Phillips at telephone number 308-1515.
